

# Caring for Your Jacuzzi with Aqua Finesse & SpaGuard

## Upon fill up:

1. Insert **Proclear Cartridge** into the filter with the grate underneath
2. Add 2oz of **Chlorine** directly to water
3. Check Ph with **Test Strip**
4. Adjust Ph as necessary with **pH Increaser** or **pH Decreaser**
5. Add **Aqua Finesse** as specified on bottle

## After Each Use:

1. Add approximately ½ oz of **chlorine** directly to water per person

## Weekly Maintenance:

1. Check Ph with **Test Strip** and adjust as necessary
2. Shock water with 2-4 oz **Spa Shock**
3. Add **Aqua Finesse** as specified on bottle

## As needed:

1. If water is cloudy add 2 oz. of **Spa Shock + 1 oz Chlorine** or 2 oz Enhanced Shock if available

## Monthly:

1. Apply **Cover Care & Conditioner** to cover to protect from UV rays
2. Check pH with **Test Strip** and adjust as necessary
3. Remove filters from the spa. Rinse filters thoroughly and reinstall into spa.

## Every 3-4 months:

1. Drain spa and wipe down shell with a cotton towel. Once dry, apply a thin layer of **Fast Gloss** to the shell, allow 15 minutes to dry, and wipe off with a clean cotton towel.
2. Remove filters from the spa. Dilute one bottle of **Filter Clean** in four gallons of water and allow filters to soak for at least three hours. Rinse filters thoroughly and reinstall into spa.
3. Refill spa and refer to the Upon fill up portion above

Please Note: If spa is not seeing regular use every 2-3 days please check and add sanitizer at LEAST twice a week. Also, for those looking to use the least amount of chlorine possible, you may substitute the use of **chlorine** after each use with 2 oz. of **SpaShock** per person per use. Then weekly, instead of adding spa shock, add 2 oz. of **chlorine granules**.

For spas 250 gallons or less, adjust all 2 oz. measurements to 1 oz.
